Dear Colleague:

I am pleased to provide you with a copy of Wisconsin Crime and Arrests - 1989. This report is based upon monthly crime and arrest reports submitted by more than 285 law enforcement agencies throughout Wisconsin. We greatly appreciate the continued efforts of personnel from each of these agencies in collecting and reporting important crime and arrest information.

The first half of the report presents statewide information on crime and arrests together with individual sections on each Index crime. The second half of the report contains more detailed crime and arrest information for individual jurisdictions within the State, organized alphabetically by county.

Some of the most important findings are summarized at the beginning of the report (see page 3 - 1989 Crime and Arrest Facts at a Glance). These include a 5.2 percent increase in the number of Index crimes reported and a 9.2 percent increase in total arrests (including substantial increases in arrests for drug offenses, simple assault, and liquor law violations).

If you have any suggestions for improving the report in future years, please let me know. Also, if your Department requires additional copies, please contact our office.

I hope this report meets your needs and you will find it useful. Please contact our office if you need other crime-related statistics throughout the year.

Sincerely,

Jerome Lacke

Wisconsin Crime and Arrests - 1989 is the product of information provided by a variety of agencies. Without the excellent cooperation of the people in these agencies, the publication would not have been possible. The Wisconsin Office of Justice Assistance gratefully acknowledges the assistance of the Federal Bureau of Investigation, Uniform Crime Reporting Program; and especially the administrators of local law enforcement agencies and their staffs, whose efforts made the data available.

Wisconsin Crime and Arrests - 1989 is a publication of the Wisconsin Office of Justice Assistance, Statistical Analysis Center. Crime and Arrests in Wisconsin - 1989

Introduction

This report, prepared by the Wisconsin Office of Justice Assistance, Statistical Analysis Center (SAC), presents data on crime and arrests in Wisconsin during 1989. From 1970 through 1981 the state Uniform Crime Reporting (UCR) Program, operated by the Crime Information Bureau of the Wisconsin Department of Justice (DOJ), collected, compiled, and reported crime and arrest data for Wisconsin. Beginning in 1971, DOJ also provided data to the national UCR system, a program of the Federal Bureau of Investigation (FBI). Effective December 31, 1981, the state program operated by DOJ was discontinued. The 1981 data collected by DOJ were transmitted directly to the FBI, and the 1981 Wisconsin Crime and Arrests report, prepared by SAC, was based for the most part on information provided to SAC by the FBI. In 1982 and again in 1983 Wisconsin law enforcement agencies transmitted their UCR data directly to the FBI, but in addition provided copies of the the principal offense and arrest forms to the Statistical Analysis Center. As of 1984, Wisconsin resumed its status as part of the national UCR system. Since 1984, Wisconsin law enforcement agencies have provided complete UCR data to SAC, which in turn has transmitted the data to the FBI via computer tape.

The National UCR Program

The national Uniform Crime Reporting Program was initiated in 1930 by the International Association of Chiefs of Police (IACP). After soliciting input from law enforcement agencies throughout the country, an IACP committee developed uniform crime definitions and reporting procedures which could be used by law enforcement agencies in every state. The FBI was designated as the national clearinghouse for UCR data. The Committee on Uniform Crime Records of the IACP continues to serve the national program in an advisory capacity. In 1956, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body to the program. The FBI regularly receives data on reported crime and arrests from law enforcement agencies throughout the country. The data are provided either by individual law enforcement agencies or by state UCR programs which collect and compile data for their states and convey the data to the FBI. From these data the FBI publishes its annual report, Crime in the United States.

The Wisconsin UCR Program

The FBI recognized the Wisconsin Council on Criminal Justice (WCCJ) as the administrator of the Wisconsin State Uniform Crime Reporting Program effective January 1, 1984. It should be noted that the WCCJ was changed to the Office of Justice Assistance as of October 1, 1987. As indicated above, the original Wisconsin UCR program, operated by DOJ, was discontinued in 1981. The program operated by DOJ from 1970 through 1981 required that all law enforcement agencies submit UCR data either directly or through the county sheriff's office. It also required that DOJ submit the prescribed data to the FBI. DOJ expanded the national UCR program's classifications to collect more detailed and appropriate data on Wisconsin crime and arrests. From the statewide UCR data, DOJ published its annual report Wisconsin Crime and Arrests, as well as quarterly, semi-annual, and other summary reports.

In November, 1981, the WCCJ received a grant from the United States Department of Justice, Bureau of Justice Statistics, to develop Wisconsin's Statistical Analysis Center. The SAC was mandated by executive order to collect and analyze criminal justice data, produce statistical reports on crime and the justice system, and promote development of criminal justice information systems. From 1981 through 1983, SAC assumed a substantial number of the functions of the state UCR program to meet the information needs of state and local criminal justice decision-makers, elected officials and interested citizens. Since January, 1984, Wisconsin once again has designated a State UCR Program officially recognized by the FBI and part of the national system of state UCR programs.

Issues in Comparison of this Report with Earlier Reports

Care should be exercised in making comparisons of the data in this report with the data contained in previous annual reports. Adjustments may be required for the following reasons:

-- Shifting of a law enforcement agency from one population category to another based on annual re-estimation of the jurisdiction's population.

-- On occasion, the Federal Government designates an additional Wisconsin county as being included in a Standard Metropolitan Statistical Area. This would shift a Sheriff's Office from the Rural Areas category to the Suburban Sheriffs' group. (See footnote 5 on page 15 for a listing of Suburban Sheriffs' Offices.)

-- Populations are estimated for non-census years. Rates for 1989 are calculated using 1980 census data, updated with 1989 estimates published by the Demographic Services Center, Wisconsin Department of Administration.

-- County totals shown in Tables 1-9 of this report are estimates which compensate for instances of missing data when appropriate. In the 1981 Wisconsin Crime and Arrests report, these totals were actual totals of data reported, even when data were missing. Thus, caution should be exercised in comparing county totals of 1981 with subsequent years.

-- Both adult and juvenile 1981 arrest data for the City of Milwaukee published in the 1981 Wisconsin Crime and Arrests have been revised. Readers interested in comparing 1981 Milwaukee data with other years are urged to contact SAC.

1989 Crime and Arrest Facts at a Glance

- There were 204,017 serious crimes (Index Offenses) reported in 1989, an increase of 5.2 percent from the 1988 total. (page 6)
- The 1989 crime rate for Wisconsin was 4,195 serious crimes for each 100,000 residents. This figure is 26 percent lower than the national crime rate of 5,664 reported for 1988. (page 14)
- Overall, 24.3 percent of the Index crimes were cleared. (page 13)
- There were a total of 355,172 arrests made in 1989. (page 9) Total adult arrests increased by 10.9 percent and juvenile arrests grew by 5.1 percent. (pages 7 & 8)
- The 176 murders in 1989 represent the largest number reported since UCR figures have been compiled. (page 31)
- Nearly three-fourths of sexual assault victims were juveniles. (page 42)
- Robberies carried out with firearms increased from 34.3 percent in 1988 to 41 percent in 1989. (page 50)
- The proportion of aggravated assaults involving the use of a personal weapon increased from nearly 38 percent in 1988 to 52.2 percent in 1989. (page 56)
- The number of reported burglaries has decreased by 20.3 percent from 1979 to 1989. (pages 60 & 91)
- The average value stolen in thefts was $282, an increase over the $269 average value in 1988. (page 68)

- The average loss in 1989 arsons was about $7,035, a substantial decrease from the $8,504 average in 1988. (page 80)
- Over $127,000,000 in property was stolen during 1989, an increase from the more than $101,000,000 in property stolen in 1988. (page 207)
- There were 25,234 arrests for simple assault; this figure represents a 56 percent increase from 1988 arrests. This increase may have been due to enforcement of the domestic violence statute. (page 82)
- Arrests for liquor law violations increased by nearly 8 percent to 42,197. (page 84)
- While total drug-related arrests increased by 14 percent, arrests involving opium/cocaine increased by 21.6 percent. (page 83)
- Three Wisconsin law enforcement officer lost their lives while in the line of duty. (page 95).
- There were 932 assaults on law enforcement officers reported; 98 percent of these were cleared. (page 95)

[1] The crime clock should be viewed with caution. Since it is the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of Index Offense occurrence. This method of display does not imply a regularity in the commission of Index Offenses; rather it shows the ratios of crimes to fixed periods of time.

An Overview of 1988 and 1989 Crime and Arrests in Wisconsin

The following tables and maps present an overview of 1988 and 1989 crime and arrests in Wisconsin. Table 1 shows that reported Index Offenses have increased by 5.2 percent from 1988. While reported violent offenses have increased by 3.7 percent from 1988, property offenses have increased by 5.2 percent. The overall increase in violent offenses is due to increases in murder, forcible rape, and robbery. Murder increased by 21.4 percent, from 145 to 176. Forcible rape increased by 4.1 percent, from 950 to 989. Robbery increased by 12.5 percent, from 3,254 to 3,660. However, aggravated assault decreased by 1.5 percent, from 6,078 to 5,987. It should be noted that the number of reported aggravated assaults only declined because of a substantial decrease in the City of Milwaukee. Also, violent offenses constituted only 5.3 percent of Index Offenses for Wisconsin in 1989.

Property crimes comprise the balance of the Crime Index. The overall increase in reported property crimes from 1988 to 1989 is due to increases in each of the four property offenses. Burglary increased by 0.9 percent, from 35,373 to 35,690. Theft increased by 4.6 percent, from 133,838 to 140,019. The most dramatic increase was for motor vehicle theft which increased by 23.8 percent, from 13,043 to 16,151. Also, arson increased by 3.0 percent, from 1,306 to 1,345.

The next three tables present a comparison of statewide arrests in 1988 and 1989. Adult arrests for total Index Offenses increased by 8.2 percent, while juvenile arrests for total Index Offenses increased by 9.4 percent. Total arrests for Index Offenses, combining both adults and juveniles, increased by 8.7 percent. Juvenile arrests constituted 43.7 percent of all arrests for Index Offenses in 1988, compared to 43.4 percent in 1988. Total adult arrests rose by 10.9 percent, from 235,970 to 261,655 while total juvenile arrests increased by 5.1 percent, from 88,959 to 93,516. Total arrests for adults and juveniles combined increased by 9.3 percent from 324,929 in 1988 to 355,172 in 1989.

Juvenile arrests comprised 26.3 percent of all arrests for 1988, but they comprised 43.7 percent of arrests for Index Offenses. Among the Index Offenses, juvenile arrests comprised 18.9 percent of all arrests for violent offenses and 47.1 percent of all arrests for property offenses.

Following the set of four tables are two maps showing rates of violent and property crime in each Wisconsin county for 1989. On each map, counties are ranked in four groups according to number of offenses per 100,000 population. The statewide rate, shown on each map, is based on the statewide number of offenses and population. This rate is within the fourth quartile because most of the highest crime rates are in those counties with largest populations.

An analysis of total Index Offenses, violent offenses, property offenses, and each separate offense appears in the following section of this report. The next section contains more detailed information on arrests for all UCR crime categories. Ten-year trends in offenses, offense rates, clearances, and arrest ratios are then presented, followed by data on law enforcement officers killed and assaulted.

CRIME INDEX OFFENSES

Definition:[1] Crime Index Offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Attempts are included (an attempted murder is classified as an aggravated assault).

1989 Summary Analysis

- There were an estimated 204,017 Crime Index Offenses reported during 1989, a 5.2 percent increase from 1988.
- One Index Offense was reported approximately every two minutes, 35 seconds during 1989.
- The most frequent month for Crime Index Offenses was August (20,054), the least frequent was February (12,798). These high and low months were the same in 1988.
- The Crime Index Offense rate per 100,000 Wisconsin residents was 4,195.2 in 1989, an increase of 4.1 percent from the 1988 rate of 4,028.4 per 100,000.
- The 1989 rate of 4,195.2 per 100,000 is 26 percent less than the 1988 rate of 5,664.2 per 100,000 residents for the nation.
- In terms of the population groupings of Wisconsin jurisdictions, the larger the population category, the higher the rate of Index Offenses.
- Total Index Offenses have decreased by 2.2 percent between 1979 and 1989.
- An estimated total of 62,757 persons were arrested for Index Offenses in 1989, an increase of 8.7 percent. Of these, 56.2 percent were adults.
- Overall, 24.3 percent of Index Offenses were cleared in 1989. Clearance rates varied widely, however, from nearly 82 percent for murder to 15.7 percent for burglary. The 1989 clearance rate of 24.3 percent was greater than the 1988 rate of 23.8 percent.

Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by law enforcement officers in the line of duty or by private citizens during commission of the felony; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

SEXUAL ASSAULT AND FORCIBLE RAPE

Definition: Sexual assault is sexual contact or sexual intercourse with another person without consent of that person. Sexual assault is proscribed under Wisconsin statutes, but is not part of the Federal Uniform Crime Reporting (UCR) Program. Forcible rape is part of the Crime Index and as such is reported as part of the Federal UCR Program. It is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) is not included.

Sexual Assault - 1989 Summary Analysis

Information on sexual assault is vital to an understanding of crime trends in Wisconsin. Rape is not a legally meaningful category in this state. However, rape is part of the Crime Index and information on rape is vital to the national UCR program. Furthermore, many years of information on rape are available for Wisconsin, and current information on rape is valuable for purposes of comparison. Jurisdiction-by-jurisdiction listings for rape appear in many of the tables at the end of this publication. This listing of rapes will continue in future years as long as rape continues to be part of the Crime Index.

Following are some highlights of the sexual assault figures presented on the following four pages.

- There were an estimated 5,823 sexual assaults reported during 1989, a 12.6 percent increase from the estimated 1988 total of 5,169. (Note: these figures are estimated totals, all other figures used in this section are reported data.)

- Approximately 17 percent of all sexual assaults were rapes. For victims over 16, the proportion of rapes was much higher, 38.9 percent.

- Nearly 75 percent of all sexual assault victims were juveniles. Over 66 percent of all victims were 15 years old or less.

- Victim sex was 86 percent female, while offender sex was 96 percent male.

- Nearly 74 percent of all sexual assaults were committed by family members or friends and acquaintances, while nearly 13 percent were committed by strangers. For those sexual assaults that were rapes, over 58 percent were committed by family members or friends and acquaintances, and nearly 27 percent by strangers.

SEXUAL ASSAULT

Summary data on sexual assaults are presented in the following tables and graphs. In the tables below, sexual assaults are shown by degree for all victims, victims 15 and under, and for victims 16 and over. This is because the two most severe degrees of assault, first and second, may be so classified either by the nature of the assault or the age of the victim. Looking only at assaults of victims age 16 and over shows the distribution of assaults by degree based solely on the nature of the assault, not victim age. Most sexual assaults, even first and second degree assaults, are not rapes according to the Uniform Crime Reporting definition, and this also is shown in the table below.

Graphs showing the age and sex of victims and offenders, and relationship between victim and offender, are presented on subsequent pages. Data are also presented on arrests, victim injury, and weapons used in the commission of sexual assaults.

Statewide Arrests - 1989

The next three tables present statewide figures for each arrest category. As with other state and county level data presented in this report, these tables present estimated data. Note that the state totals in these listings may differ slightly from the corresponding totals shown in Tables 5 through 8. This is because of small differences in the procedure used to make estimates of missing data in the two types of tables. The various offenses chosen to show the highest percentage of gender or racial categories were selected according to two criteria - the highest percentage shown and the total number of arrests for that offense

Statewide Adult Arrests - by Gender

Summary of Offense and Arrest Trends: 1979 - 1989

The following four tables present statewide data on: (1) the number of Index Offenses, (2) offense rates for Index Offenses, (3) clearance rates for Index Offenses, and (4) the ratio of arrests to offenses for Index Offenses for each year from 1979 through 1989. Each table shows the percent change from 1979 to 1989. Certain adjustments, noted in footnotes to each table, were made in the total Crime Index and property offense categories to make the data comparable from year to year.

The total number of known Index Offenses in Wisconsin increased from 1979 through 1981, declined through 1985, rose in 1986 and 1987, decreased in 1988, and increased again in 1989 (see graph, page 14). The number of Index Offenses decreased by 2.2 percent for the decade, from 208,560 in 1979 to 204,017 in 1989. The 5.1 percent decrease in offense rates for the decade is greater than the decrease in number of offenses, because the population of the state increased during this period.

The number of violent offenses increased by 37.9 percent for the decade, from 7,839 in 1979 to 10,812 in 1989. However, the number of property offenses decreased by 3.7 percent for the decade, from 200,721 to 193,205. The contrasting patterns in property and violent crime are made clear in the graphs on pages 20 and 26.

Overall, arrest ratios have increased by one-third over the past decade, indicating that during this time arrests have increased more rapidly than offenses. However, in terms of specific offenses, this is not true of robbery and burglary. For these two offenses, arrests have increased less rapidly than offenses during the decade.

The clearance rate for total Index Offenses has increased since 1979. In addition, clearance rates for both total Violent and total Property crimes have increased. Among the violent crimes, clearance rates increased during the decade for forcible rape and aggravated assault. However, clearance rates for murder and robbery have decreased. Among the property offenses, clearance rates have increased for theft while they have decreased for burglary and motor vehicle theft.

[2] Arson was not reported as an Index Offense until 1980. In this table arson figures are included in the total Index and Property Offense totals for 1980 through 1989, but they are not reflected in the percent change from 1979 to 1989.

Law Enforcement Officers Killed and Assaulted

The following tables present statewide information on law enforcement officers killed or assaulted during 1989. During 1989, three Wisconsin police officers were killed due to an accident while in the performance of duty.

There were 932 reported assaults on police officers in 1989, a 0.3 percent increase compared to the 929 reported assaults in 1988. Of the 932 reported assaults, 917 or 98 percent were cleared. Nearly 60 percent of assaults occurred during the nighttime hours from 8 p.m. through 4 a.m. Injuries resulted from 50 percent of reported assaults, while nearly 95 percent of assaults involved personal weapons (hands, feet or fists) rather than firearms, knives or other dangerous weapons. In addition, this section shows both the type of assignment and type of activity at the time the assault occurred and the number of assaults on law enforcement officers since 1984.

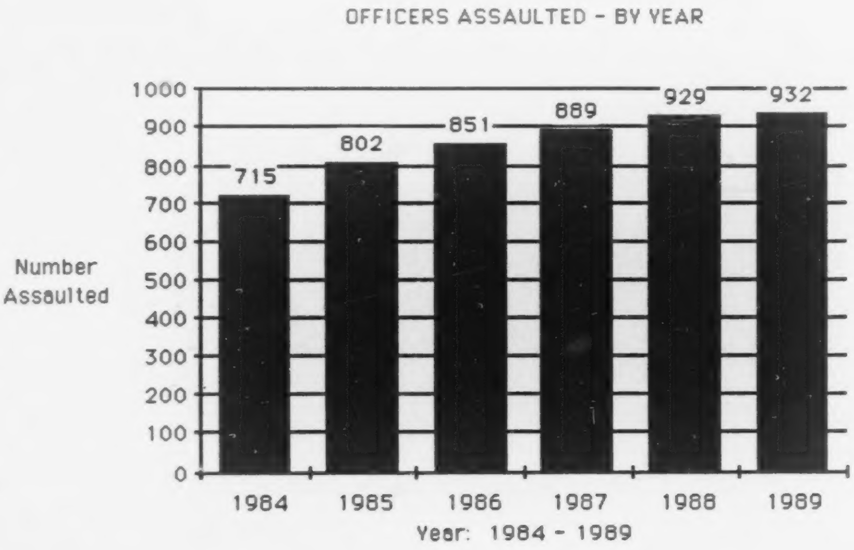
Patterns in the type of activity for officers assaulted were very similar in 1988 and 1989.



The number of officers assaulted in Wisconsin has increased steadily by over thirty percent from 1984 (715 assaults) to 1989 (932 assaults).

Index Offenses by County and Law Enforcement Agency - 1989

Table 1. Number of Crime Index Offenses and Percent Change, 1988 - 1989

Table 1 shows Index Offenses for 1988 and 1989 and percent changes from 1988 to 1989 for each jurisdiction. The four violent Index Offenses are totaled to equal violent crimes, and the four property Index Offenses are totaled to equal property crimes. The Crime Index is the sum of all eight offenses.

In Table 1 the number of months of data reported for each jurisdiction is listed. This information is vital to the interpretation of the table, since the data presented are the reported data at the jurisdiction level, even when fewer than 12 months of data were available. Twelve months of data were reported for 98 percent of the jurisdictions. However, data for jurisdictions reporting less than four months are not printed although estimates for these jurisdictions are included in county and state totals (see below). There was one of these jurisdictions in 1989.

Data for a jurisdiction which reported for fewer than 12 months in 1989 cannot be directly compared with that jurisdiction's 1988 data or with data for other jurisdictions. Thus, no percent changes are shown for these jurisdictions. However, an approximate comparison can be made using an estimate of the 12 months total. This estimate can be calculated by multiplying the available data by a correction factor which is obtained by dividing 12 by the number of months reported. (For example if nine months of data are available for an agency, the data can be estimated for 12 months by multiplying the data by 12/9 or 1.33.) However, the accuracy of this approximation diminishes when only a few months of data are available. It should be applied with great caution when less than six months of data are available. This method should also be applied with caution when the number of offenses involved is small. For example, if jurisdiction A had 72 thefts in nine months and prorated them to 96 (12/9 x 72 = 96) thefts for the year, while jurisdiction B had three thefts in nine months and prorated them to four thefts for the year, the estimate for jurisdiction A would be more reliable because it had a higher number of offenses.

The percent change in the number of Index Offenses reported from 1988 to 1989 is shown in Table 1 for each jurisdiction for which it was possible to calculate the change. The percent change is calculated using the formula:

$$\frac{(\text{Offenses in 1989}) - (\text{Offenses in 1988})}{\text{Offenses in 1988}} \times 100 = \text{Percent Change}$$

If the number of offenses for 1988 was zero, no percent change was calculated since percent change cannot be calculated from a zero base. In addition, as stated above, no percent change was calculated for a jurisdiction unless 12 months of data were available for both 1988 and 1989.

Table 1 shows county totals for each offense and percent change from 1988 to 1989. For those counties in which not every jurisdiction reported 12 months of data for 1988 or 1989, the county totals shown are estimates. The estimated county totals were obtained by summing the estimated annual totals for each jurisdiction within the county. These estimated annual totals were obtained as described above, by multiplying the available data by a correction factor for jurisdictions with four months or more of 1989 data. When less than four months of data were present, a different method of estimation was used. For these jurisdictions, the estimate used was the latest year of complete data. When estimates are used for county totals, the totals are so labeled in Table 1 (e.g., the notation "(EST)" follows the total for Barron County).

In addition, there were eight new UCR reporters during 1989. These are Cornell PD (Chippewa County), New Glarus PD (Green County), UW -La Crosse PD (La Crosse County), Somerset PD (St. Croix County), Hayward PD (Sawyer County), and Osseo, Strum and Eleva PDs (all Trempeauleau County). Each of these county headings is marked by an asterisk in Table 1. Also, for each of these agencies, only 1989 data are printed since comparable 1988 figures were not available. In certain cases (e.g., Chippewa County Sheriff's Office), the 1988 and 1989 crime figures are not directly comparable because of the change in reporting by another agency (i.e., Cornell PD) in that county.

At the end of Table 1, statewide totals of reported offenses in each category and estimates of the actual statewide totals are shown. The statewide estimates were obtained by summing the estimated offenses for each jurisdiction.

Table 2. Offense Rates per 100,000 Population for Index Offenses, 1989

Table 2 presents offense rates per 100,000 population for Index Offenses for each jurisdiction. The populations shown in this table are from Official Population Estimates for 1989, published by the Demographic Services Center of the Wisconsin Department of Administration. The population shown for each county Sheriff's Office is the total population of the county minus the populations of any municipalities in the county for which UCR data were reported separately. The rates shown in Table 2 are derived by taking the number of reported offenses, shown in Table 1, dividing by the population of the jurisdiction, shown in Table 2, and multiplying by 100,000. These rates permit comparisons among jurisdictions of different sizes. Offense rates for agencies with 0 permanent residents (e.g., UW Campus agencies, State Patrol or DNR) are not calculated.

As discussed in connection with Table 1, 12 months of data were available for 98 percent of jurisdictions. Since offense rates based on less than 12 months of data would be misleading, Table 2 presents rates only for those jurisdictions which reported 12 months of data. The countywide and statewide rates shown in Table 2 are based on estimated numbers of offenses when necessary, as described in connection with Table 1.

It should be noted that offenses per 100,000 presented in Table 2 do not represent a projection of crime levels in various locales. Rather, offense rates are used to enable one to compare jurisdictions of varying size. However, two points should be kept in mind when analyzing the offense rates in Table 2. First, offense rates for jurisdictions with large numbers of temporary residents (i.e., tourists) such as the Police Departments of Lake Delton, Minocqua and Wisconsin Dells are misleading since only permanent residents are included in offense rate calculations. Second, jurisdictions with a large proportion of non-residential crime targets (e.g., Town of Madison and Town of Beloit) often show inflated crime rates.

Table 3. Total Clearance Rates for Index Offenses, 1989

Table 3 presents total clearance rates by offense and jurisdiction. In Table 3, the various clearance rates are the number of clearances, divided by the number of offenses and multiplied by 100. That is, clearances are presented as a percentage of reported offenses. Note that no clearance rate can be calculated for an offense category if there are no 1989 offenses reported, even though clearances may be reported from prior years. When no offenses have been reported, a blank appears in Table 3. When a clearance rate of zero is shown it means that at least one offense occurred, but that there were no clearances. Clearance rates greater than 100.0 percent are possible (e.g., robbery clearance rate of 200.0 percent for Menasha) when there are clearances of offenses reported in earlier years.

Since the clearance rate is the ratio of clearances to reported offenses, it is not particularly sensitive to the problems of missing data described above for Tables 1 and 2. It is reasonable to assume that this ratio would be fairly constant as long as the number of months of data available was reasonably large. Thus, clearance rates have been presented in Table 3 for all jurisdictions for which six months or more of clearance data were present. There were four jurisdictions reporting fewer than six months of data which were excluded from the table. An asterisk (*) is printed next to the name of each of these jurisdictions. Countywide and statewide rates shown in Table 3 are based on estimated clearances and offenses, calculated as described above in connection with Table 1.

Table 4. Property Stolen, Recovered and Damaged by Arson, 1989

Table 4 shows the value of property stolen, recovered and damaged by arson for each county and law enforcement agency reporting UCR data. All values shown in Table 4 are reported data; no estimates are performed on partial or missing figures.

Prior to the 1988 Annual Crime and Arrests Report, Table 4 presented the percentage of total clearances involving only juveniles. However, both because this measure minimized juvenile involvement in clearances and a relative lack of interest in these data, this table was replaced in the 1989 UCR report. However, juvenile clearance figures for individual agencies are available upon request.

Arrests by County and Law Enforcement Agency - 1989

Tables 5 through 8 present data on adults and juveniles arrested by Wisconsin law enforcement agencies during 1989. The tables present the total number of arrests, the total numbers of Part I and Part II arrests, and the number of arrests for each Part I and Part II offense separately, for each reporting agency. Information on adults is presented in Tables 5 and 7, information on juveniles in Tables 6 and 8.

As indicated in the introduction to this report, data are not available for all 12 months of 1988 for every reporting agency. In the following tables, as in Tables 1 through 4, the number of months of data available for each reporting agency is listed. Although only the known data are presented for each jurisdiction, an estimated yearly total can be calculated for any jurisdiction with less than 12 months of data reported. The estimated totals can be calculated by multiplying the number in the table by a correction factor which can be obtained by dividing 12 by the number of months of data reported. (Thus, if 11 months of data are presented for an agency, for example, the agency's figures should be multiplied by 12/11, or 1.09). As is the case in other tables, the more months of data reported, the more accurate will be the yearly estimates. Estimates based on a small number of months of reported data should be interpreted cautiously. This estimation procedure should also be applied with caution when the number of arrests is small.

The following tables show, for each county, county total arrests for each offense. For those counties in which not every jurisdiction reported 12 months of data for 1988, the county totals shown are estimates. These estimates were obtained as in Table 1, by calculating and summing the estimated annual total for each jurisdiction within the county. As in the previous table, when estimates are used for county totals, the notation "(EST)" follows the "County Total" label.

At the end of each table there are statewide totals of the reported arrests in each category and estimates of the actual statewide totals. The estimated totals were obtained by calculating the estimated yearly totals, as described above, for each reporting agency with less than 12 months of data and summing the estimates for these agencies and the reported figures for the other agencies.

These tables also contain population figures for each jurisdiction. Tables 5 and 7 contain adult population figures. Tables 6 and 8 contain juvenile population figures. These adult and juvenile figures were derived from the Department of Administration (DOA) population estimates, Official Population Estimates for 1989 using adult and juvenile population proportions provided in the 1980 census and updated with 1983 DOA estimates. The population figures presented for county sheriffs' offices are the county populations minus the populations of any municipalities in the county for which UCR data are reported separately. These figures can be used to calculate arrest rates for any of the jurisdictions in the State. Arrest rates are calculated by dividing the number of arrests by the relevant population and multiplying the result by 100,000. This rate per 100,000 is comparable across jurisdictions of varying sizes.

Statewide Property Information

The next table, Property Stolen and Recovered by Type of Property, shows the monetary value of property both stolen and recovered by category of property for the entire State in 1989. The table also shows the percent of value recovered for each type of property.

Table 9: Number of Full Time Law Enforcement Employees in Wisconsin as of 31 October, 1989

The data in this table come from a yearly survey conducted each fall by the Federal Bureau of Investigation. For every jurisdiction, it shows the number of full time sworn law enforcement employees (male and female), the number of civilian employees (male and female), and the total number of employees for every UCR jurisdiction. In addition, the table lists the total population for each jurisdiction, and both the number of law enforcement employees and the total number of employees per 1,000 population. It should be noted that figures for the number of officers per 1,000 population for some agencies are absent since no permanent resident population is assigned (e.g., UW Campus Security Agencies, DNR, State Patrol).

Appendix I

Glossary

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for commission of an offense in the local reporting jurisdiction. An arrest has occurred when a law enforcement officer detains a person with the intention of seeking charges against them for a specific offense and a record is made of the detention (see p. 60, Uniform Crime Reporting Handbook). Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants, are not scored. Included are those persons released without having been formally charged. (See Juvenile Arrest.)

ARREST RATE: The number of arrests for a particular offense, or group of offenses, per 100,000 population. The formula is:

$$\frac{\text{Number of Arrests}}{\text{Population}} \times 100{,}000$$

Arrest rates per population unit are employed to remove the effects of differing sizes of law enforcement service areas, permitting the examination of arrest on an equalized population basis. "Per 100,000 population" is generally utilized to preclude rates for infrequently occurring arrests from being expressed as unmeaningfully small numbers.

CLEARANCE: An offense is cleared, or solved for crime reporting purposes, when at least one person is arrested, charged with commission of the offense and turned over to the court for prosecution. Provision is also made for clearance in certain "exceptional" situations (see p. 42, Uniform Crime Reporting Handbook).

CLEARANCE RATE (TOTAL): The number of clearances divided by the total number of offenses, expressed as a percent. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100\%$$

Offenses are reported as they become known to law enforcement agencies. Clearances are scored as they are made. Therefore, it is possible for the clearance rate to exceed 100 percent for a time period. Both clearances by arrest and exceptional clearances are included.

CRIME FACTORS: Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. No definitive conclusions have yet been reached; many factors affect the volume and type of crime that occurs from place to place. Caution should, therefore, be exercised in comparing statistical data of individual communities or counties solely on the basis of their populations.

More appropriate use can be made of the statistics by relating the experience of a particular area to group averages, or by employing a ranking procedure, and encompassing both crime and other socio-economic information.

CRIME INDEX: The total of eight serious offenses used as an indicator of crime. Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft and arson. The first four of these are referred to as violent crimes, and the latter four as property crimes. Definitions of each of these offenses are given in the section "Statewide Index Offenses and Arrests.

JUVENILE: A person 17 years of age or younger.

JUVENILE ARREST: For purposes of Uniform Crime Reporting, a juvenile should be counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be tallied (see Uniform Crime Reporting Manual, p. 60). All violations by juveniles where some police or other official action is taken beyond a mere admonishment, including status offenses, are included. Law enforcement contacts with juveniles where no offense has been committed are not scored as arrests. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored as being arrested if they have not committed an offense. (See Arrest)

JUVENILE CRIME: The only measure of juvenile crime available through Uniform Crime Reporting is the number of juvenile arrests (number, rate, and percentage of total arrests).

OFFENSE RATE: The number of known offenses per 100,000 population. The formula is:

$$\frac{\text{Number of Offenses}}{\text{Population}} \times 100{,}000$$

Offense rates per population unit are employed to remove the effect of differing sizes of law enforcement service areas, permitting the examination of reported crime on an equalized population basis. "Per 100,000 population" is generally utilized to preclude the rates for infrequently occurring offenses from being expressed as unmeaningfully small numbers.

More specific crime or victimization rate measures may also be utilized, such as residential burglaries per 100,000 residences, motor vehicle thefts per 100,000 registered vehicles, or forcible rapes per 100,000 females in typically victimized age groups.

PART I OFFENSES: The eight index crimes in addition to manslaughter by negligence.

PART II OFFENSES: All crime categories not already designated as Part I, excluding all traffic violations except Operating a Motor Vehicle While Intoxicated.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period} - \text{Value in Base Period}}{\text{Value in Base Period}} \times 100\%$$

POPULATION: Totals as well as juvenile and adult subtotals are based on Official Population Estimates for 1989, Wisconsin Department of Administration, Demographic Services Center.

STATUS OFFENSES: Offenses which are only offenses when they are committed by a juvenile. For purposes of the Wisconsin UCR Program, status offenses consist of curfew violations, runaways, and liquor law violations.

Appendix II

The Use of UCR Statistics by Local Agencies

A. INTRODUCTION

The graphs and tables which follow illustrate some of the potential uses of the UCR report. The examples in this report are drawn from special reports done for individual agencies during the past year. These special reports usually summarize UCR data for two to five years and are generally used for budgetary purposes or are included in the annual report of a law enforcement agency.

The various tables in the second half of the annual report contain various crime/arrest figures for all reporting jurisdictions together with statewide figures. In addition, offense rate figures for violent crime (page 21 of the 1989 Annual UCR Report) and property crime (page 27) allow law enforcement agencies to compare their crime rates with agencies of similar size throughout Wisconsin.

Several points should be noted with regard to the use of UCR figures --

1 - Crime and arrest figures from past years can be obtained from earlier UCR reports or by contacting Tom Eversen at the Wisconsin UCR Program in Madison (608) 266-7644. These figures are available as far back as 1969. However, specific crime and arrest details may not be consistent for each year.

2 - Numbers and percentage changes can vary widely over time either due to the relatively small numbers involved (e.g., murder or arson) or changes in state statutes (e.g., increase in the legal drinking age).

3 - **Care should be taken when comparing the figures of one agency to those of another.** For example, a large number of tourists (Lake Delton or Wisconsin Dells) can inflate the crime rate. Also, individual agency policies or increased enforcement of certain local ordinances (e.g, curfew laws) may affect the number of arrests.

Note: The jurisdiction tables from the Annual UCR Report are capitalized in bold (e.g., **TABLE 1**).

B. OFFENSES REPORTED

TABLE 1 in the 1989 Annual Report (pages 102 to 119) can be used to obtain two years of crime figures. Numbers from earlier years can be obtained from previous UCR reports.

Example 1 - Crime Totals (2 years)

Table A compares reported Index crimes in 1988 and 1989 for the Manitowoc Police Department.

Table A: Index Crimes Reported to the Manitowoc Police Department, 1988 and 1989

Index Offense	1988	1989	Percent Change
VIOLENT CRIME	23	34	+47.8%
Murder	0	0	-
Forcible Rape	5	11	+120.0%
Robbery	0	2	*
Aggravated Assault	18	21	+16.7%
PROPERTY CRIME	1,422	1,381	-2.9%
Burglary	219	155	-29.2%
Theft	1,163	1,166	+0.2%
Motor Vehicle Theft	38	51	+34.2%
Arson	2	9	+350.0%
TOTAL CRIME	**1,445**	**1,415**	**-2.1%**

* Percent increase cannot be calculated when the base year (1988) figure is zero.

Total reported crime decreased by 2.1% during 1989 in Manitowoc. While most reported crime increased somewhat, this was offset by a large decrease in reported burglaries.

Example 2 - Crime Totals (5 years)

Table B shows the number of Index offenses (also known as Part I crimes) reported to the Marinette County Sheriff's Office from 1985 through 1989 Again, figures for years prior to 1989 can be obtained either from earlier editions of the Annual Crime and Arrest Report or by contacting the Wisconsin UCR Program.

Table B: Index Offenses, 1985 - 1989 - Marinette County SO

Offense	1985	1986	1987	1988	1989	Percent Change 1985 to 1989
VIOLENT CRIME	16	10	13	7	13	-18.8%
Murder	0	0	1	0	0	-
Forcible Rape	6	1	0	1	0	-100.0%
Robbery	0	0	2	2	0	-
Aggravated Assault	10	9	10	4	13	+30.0%
PROPERTY CRIME	610	672	712	574	580	-4.9%
Burglary	309	341	341	242	261	-15.5%
Theft	275	298	336	302	304	+10.5%
Motor Vehicle Theft	24	29	34	28	14	-41.7%
Arson	2	4	1	2	1	-50.0%
TOTAL	**626**	**682**	**725**	**581**	**593**	**-5.3%**

Total Index crime declined by 5.3% during the five year period. While there were decreases in reported motor vehicle thefts and burglaries, there were increases in the number of reported thefts and aggravated assualts.

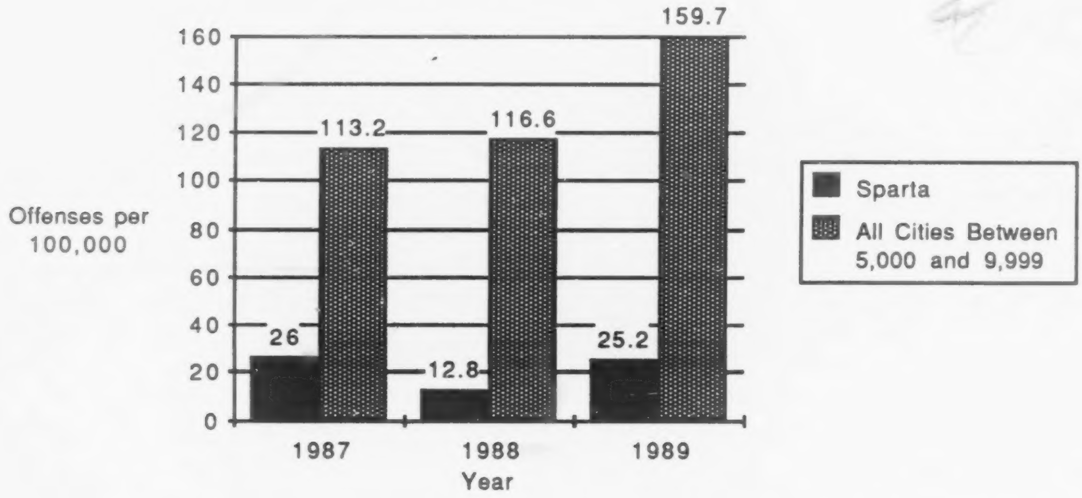
C. OFFENSE RATES

TABLE 2 in the 1989 Annual Report (pages 120 to 128) is used to obtain the offense rate per 100,000 residents for an agency. Crime rates per 100,000 are used to permit the comparison of jurisdictions with different population levels. Figures for categories of jurisdictions of similar size can be seen on pages 21 (Violent Crime) and page 27 (Property Crime) of the 1989 Annual Report.

Example 1 - Offense Rates (Violent Crime)

Graph 1 presents information on violent offense rates per 100,000 residents for the Sparta Police Department and compares these rates to the average rate for all Police Departments in Wisconsin serving populations of between 5,000 and 9,999 residents. The figures include the three years from 1987 through 1989

Graph 1: Violent Offense Rates

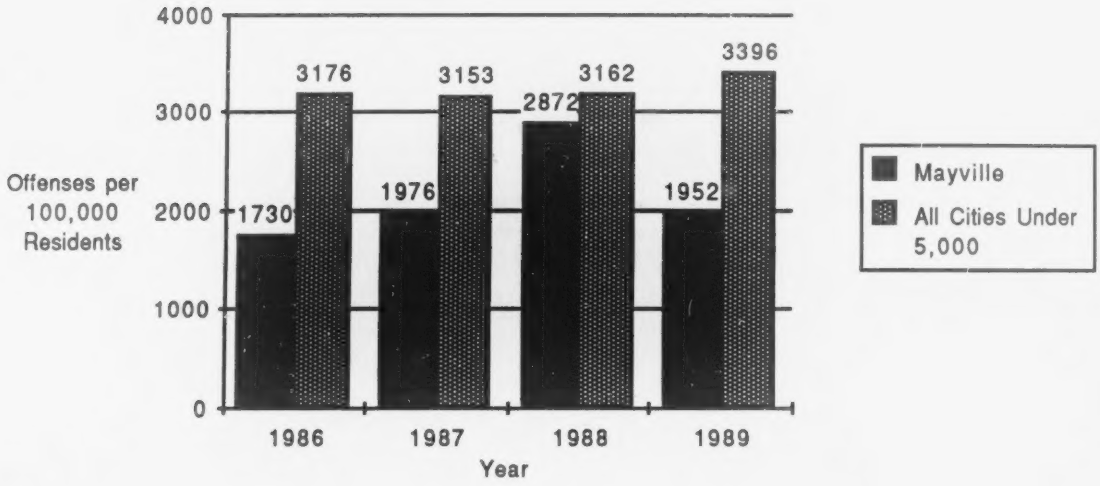


During the past three years the Violent offense rates in Sparta have been considerably less than the combined rates for other Wisconsin cities of similar size.

Example 2 - Offense Rates (Property Crime)

Graph 2 presents similar information on property crime offense rates for the Mayville Police Department. However, the property offense rates are shown for the past four years, 1986 through 1989.

Graph 2: Property Offense Rates



During the past four years the property crime rate in Mayville has been considerably less than the average property crime rate in other Wisconsin cities of similar size.

D. CLEARANCES

TABLE 3 (pages 130 to 138) in the 1989 Annual Report shows clearance rates for individual jurisdictions. It should be noted that clearance rates are usually lower in Sheriff's Offices than in Police Departments because of the relative isolation of many of the crime targets in more rural areas.

Example 1 - Clearance Rates

Information in Table C shows the clearance rates for the North Fond du Lac Police Department for Total Index, Violent Index, and Property Index crimes for the past five years. Statewide clearance rates for 1989 are included for purposes of comparison.

Table C: Clearance Rates, 1985 - 1989, North Fond du Lac PD

94

Offense Category	1985	1986	1987	1988	1989	State - 1989
Violent Index	100.0	100.0	100.0	100.0	100.0	59.9
Property Index	34.8	32.7	30.9	33.3	29.4	22.3
Total Index	37.6	33.1	32.0	34.0	29.8	24.3

The various clearance rates for the North Fond du Lac Police Department have remained quite consistent and have been greater than the Statewide clearance rates.

E. PROPERTY LOST AND RECOVERED

TABLE 4 (pages 140 to 148) in the 1989 Annual Report shows the total value of property stolen and recovered for each jurisdiction together with the total value of property lost in arson cases. More detailed information on the various types of property can be obtained from the State UCR Program. The percentage of property recovered often depends upon the type of property stolen as certain property such as automobiles are recovered more often than is jewelry or money.

Example 1 - Property Stolen and Recovered

Table D shows the value of property lost and stolen in Racine during 1989. As noted above, this more detailed property information can be obtained from the State UCR Program.

Table D: Property Stolen and Recovered, 1989, Racine PD

Type of Property	Value Stolen	Value Recovered	Percent Recovered
Motor Vehicles	$ 1,783,152	$ 1,690,577	94.8%
Televisions, Stereos, Etc.	395,474	26,430	6.7%
Jewelry, Precious Metals	269,494	28,199	10.5%
Currency, Notes	235,123	23,430	10.0%
Household Goods	59,149	5,594	9.4%
All Other Property	987,165	94,730	9.6%
TOTAL PROPERTY	$3,729,657	$1,868,960	50.1%

The overall property recovery rate of 50.1% in Racine for 1989 was greater than the 40% recovery rate for the entire State.

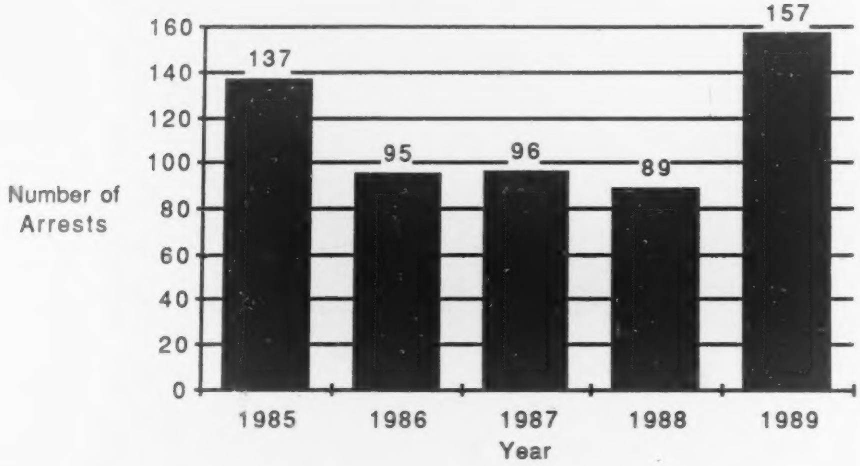
F. ARRESTS

Adult arrests are shown in **TABLE 5** (pages 150 to 158) and **TABLE 7** (pages 170 to 187) of the 1989 Annual Report. Juvenile arrest figures are shown in **TABLE 6** (pages 160 to 168) and **TABLE 8** (pages 188 to 205) of the 1989 Annual Report. **TABLES 5** and **6** present arrest totals for all Part I Crimes (eight Index crimes plus negligent manslaughter) in addition to the number of total arrests and Part II arrests. **TABLES 7** and **8** present arrest totals for each Part II offense together with more detailed totals on drug-related arrests.

Example 1 - Adult Arrests (5 years)

Graph 3 shows the number of adult arrests made by the Minocqua Police Department from 1985 through 1989.

Graph 3: Total Adult Arrests -
Minocqua PD

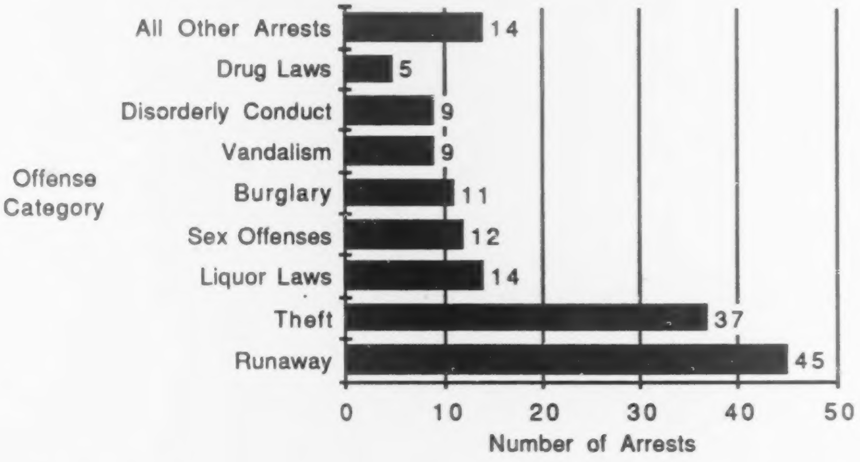


Total adult arrests declined in 1986, remained fairly stable until 1988, then increased sharply in 1989. Total adult arrests increased by 14.6 percent from 1985 1989.

Example 2 - Juvenile Arrests (1 year)

Graph 4 shows the most common juvenile arrests made by the Altoona Police Department in 1989.

Graph 4: Juvenile Arrests - 1989,
Altoona PD



The total of 156 arrests of juveniles in 1989 was 32.2 percent greater than the 118 juvenile arrests made in 1988 by the Altoona Police Department.

G. SUMMARY

These pages have presented examples of how figures from the Annual UCR Report can be used by individual agencies. Additional possibilities for analysis include more detailed breakdowns of burglary and theft targets, weapon usage in violent crime, drug arrest details (see **TABLES 7** and **8**), and law enforcement strength (see **TABLE 9** of the 1989 Annual Report). In addition, arrest rates (both adult and juvenile) can be obtained in the same way that offense rates are calculated in **TABLE 2.** Directions for obtaining arrest and offense rates are presented in Appendix I (Glossary) of this report.

Also, the State UCR Program can provide graphical presentation of crime and arrest figures if an individual agency lacks the capability. In addition, various crime figures can be presented on either a county-wide or regional basis.
